Well, The style is fun, the gameplay is. also quite fun. The dry humor guiding you through the mission is good aswell. sometimes a bit cheesy.. I enjoyed the game I have a few gripes about the controls but other than that I have no other complaints was certainly worth the full price to me.. My Initial Thoughts: I loved the concept, the aesthetics and the immersion which is why I am giving this a recommendation. However, I did experience some ground breaking issues playing on the Oculus Rift. To refill the water pistol featured for fighting the fires I had to jump into th games menu each time. This was a major problem for me on reaching the 1st Boss. I have told the devs about my issues and I have faith they will be sorted.. Grabbing this game ended up being a welcome late-night distraction after a longer day at work. It's short, as many Unity VR titles are , yet sweet, as many indie VR shooters are . The small selection of levels each offer distinct scenarios centering on a different weapon. Gunplay feels great and, as always, I wish there was more of it. As a silly America, I love how Australian the game is in its outrageous dialogue. It's easy to tell that the team behind Paperville Panic had a good time crafting the game. It should also be noted that this game is surprisingly vulgar and features many crude innuendos. It's all fun and games, but I'm still concerned about the kid-friendly cardboard/paper visuals reeling in a younger audience. I really suggest playing the demo. While it spoils some of the

best bits of the game, it's a riot and fits into a short session thats worth experiencing or even sharing with friends locally. G'donya Ultimearse.. Fun little game from what I've tried so far.. I enjoyed the game I have a few gripes about the controls but other than that I have no other complaints was certainly worth the full price to me.. I enjoyed the game I have a few gripes about the controls but other than that I have no other complaints was certainly worth the full price to me.. Great game. The style is awesome, and all the characters walking around really makes the town seem alive. The levels are aren't too challenging, and the game ran under 3 hours, but lots of fun and some replayability. Definitely recommend. One suggestion i have would to have a language filter in the settings. The game has great humor that i didn't feel was bad, but there were a few places where the language gets a bit rough and not appropriate for kids. However most of the game seemed perfect for all ages. One wish would be to see mods for this game. With the town and characters, there is so much potential for more levels and mini games.. The game is heaps of fun. Love the characters and world building. Although I am new to VR it was a wonderful experience and challenging for me. Teleporting didn't make me feel sick compared to some other VR titles.. I enjoyed the game I have a few gripes about the controls but other than that I have no other complaints was certainly worth the full price to me.
